## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's response filed May 4<sup>th</sup> 2007 has been entered and made of record.
2. Applicant has amended claims 1-2, 4-10 and 12-18. Claims 3 and 11 are cancelled. Claims 1-2, 4-10 and 12-18 are now pending.
3. Applicant's remarks have been fully considered and are found to be persuasive in view of the newly presented amendments. The claims are now in condition for allowance. Reasons for allowance are given below.

### ***Allowable Subject Matter***

4. Claims 1-2, 4-10 and 12-18 allowed.

The following is an examiner's statement of reasons for allowance:

Applicant has amended independent claims 1, 9 and 15 to include the limitation of performing a test on a neighborhood of pixels that determines whether or not a the thinning/erosion breaks certain image features. If the test determines that features are not broken, then the system will subtract a fixed grey value to perform the thinning. The reference to Suzuki teaches the subtraction of grey values to thin/erode a binary image, but does not teach the neighborhood test to verify whether or not features are broken. No other found prior art of record teaches or fairly suggests this practice. Independent claims 1, 9 and 15 and all corresponding dependent claims are accordingly allowed.

All previously presented rejections under 35 USC 112 are also withdrawn in view of the newly presented amendments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
